Brodie Bishop

Senior Consultant

Relevant Qualifications

- Bachelor of Science (Chemistry)
- Master of Environment (Environmental Management)
- Diploma of Laboratory Technology (Chemical and Forensic)
- Licensed Asbestos Assessor – (LAA001486)
- NATA Accredited Inspection Surveyor
- NATA Accredited Signatory
- NATA Accredited Airborne Contaminant Exposure Sampler

Professional Overview

Senior Consultant with specialised qualifications and extensive experience in contaminated land assessment and remediation, occupational hygiene and hazardous materials. He brings specialist expertise in geochemistry and laboratory technology, supporting high-quality analysis and robust technical decision-making. He conducts specialised water-quality testing of Australian naval vessels, ensuring compliance with environmental standards within defence maintenance programs. Brodie is relied upon for expert oversight of multifaceted and technically demanding projects across diverse industry sectors.

Contaminated Land – Select Experience

Penrith City Council – Detailed Site Contamination Assessment
Brodie undertook sampling via mechanical drill rig, with VOC screening via a photo-ionisation detector. Asbestos air monitoring was carried out around the boundary of the site throughout the project.

Penrith City Council – Jamison Dog Park Site Remediation Supervision
Brodie was engaged as supervisor for the remediation of Jamison Dog Park. Brodie was stationed on site for the duration of the project to direct contractors to ensure the Remedial Action Plan was followed correctly to a standard that can be validated.

Penrith City Council – Kokoda Park Site Supervision
Brodie supervised the remediation of Kokoda Park following the discovery of asbestos contamination and was present on site for the duration of remediation works. At completion, Brodie prepared a Validation Report outlining that the site had been remediated to meet all State and National requirements.

Hazardous Materials – Select Experience

Penrith City Council – Asbestos Material Surveys
Brodie was part of the project team for asbestos surveys of over 100 Penrith City Council assets. The project involved the creation of asbestos registers for all assets.

Senior Consultant

Hazardous Materials – Select Experience (cont.)

NSW National Parks & Wildlife – Asbestos Material Surveys
Brodie was part of the project team for asbestos surveys of 20 NSW National Parks & Wildlife assets. The project involved the creation of asbestos registers and management plans for all assets.

Presbyterian Aged Care – Hazardous Building Materials Surveys
Brodie was part of the project team for hazardous building material surveys of 11 Presbyterian Aged Care assets. The project involved the creation of hazardous building material registers and an overarching management plan for all assets.

Cumberland City Council – Hazardous Building Materials Surveys
Brodie was part of the project team for hazardous building materials surveys for a mix 28 residential and commercial Cumberland City Council assets across the Cumberland City Council LGA.

Occupational Hygiene – Select Experience

Thales Australia – Water-Quality Compliance Testing for Docking Operations
Brodie undertakes water-quality assessments for naval vessels entering the Sydney dock precinct, collecting and analysing samples to verify compliance with environmental standards and support safe docking operations.

Palm Lakes Works Pty Ltd – Mould Assessment
Brodie undertook a mould assessment at large resort following flooding that affected multiple villas. This involved visually inspecting all areas of each villa for signs of macroscopic mould, soiling or moisture; the collection of more than 50 surface samples for microscopic mould; and the measuring of relative moisture levels of walls/floors to identify areas of concern.

Cleanaway Pty Ltd – Air Quality Monitoring
Brodie undertook air quality monitoring at a Cleanaway waste facility. This involved monitoring for VOCs, dust and particulates and harmful atmospheric gasses, with a mix of static and personal monitoring on employees.

BKH Group – Respirable Silica Monitoring
Brodie undertakes occupational monitoring for respirable silica dust for BKH Group employees at various sites on a quarterly basis. This involves a mix of static and personal monitoring.

The University of Technology, Sydney – Indoor Air Quality Assessment
Brodie undertook an indoor air quality assessment for the University of Technology Sydney. This involved monitoring for general air quality parameters, airborne mould, particulates and dust, as well as collecting surface mould samples.
