Cameron Becker

Senior Consultant

Relevant Qualifications

- Bachelor of Science (Honours)
- Licensed Asbestos Assessor – (LAA002168)
- Provisional Member – Australian Institute of Occupational Hygienists
- NATA Accredited Inspection Surveyor
- NATA Accredited Signatory
- NATA Accredited Airborne Contaminant Exposure Sampler

Professional Overview

Senior Consultant with specialist expertise in hazardous materials, contaminated land and occupational hygiene. Cameron conducts thorough investigations, monitoring programs and remediation oversight, supporting clients to meet regulatory and safety requirements. He heads up Getex's Central Coast office, supporting clients across the region, as well as across Greater Sydney. He is recognised for delivering reliable technical advice, clear reporting and robust environmental and occupational health and safety solutions across diverse project environments.

Contaminated Land – Select Experience

Arenco Pty Ltd – Contaminated Land and VOC Remediation

Served as the on-site environmental consultant for the duration of remediation works at Chullora Tank Annex. Responsibilities included:

- Oversight of contractor activities in alignment with the Site-Specific Management Plan.
- Ongoing advisory support regarding site remediation procedures.
- Execution of hygiene services including VOC monitoring and environmental sampling.
- Conducted classification of general construction waste and VOC-impacted soil in accordance with applicable regulatory frameworks.

Graphite Projects – Soil Assessment

Conducted a soil due diligence assessment to evaluate contamination risks and inform waste classification for planned upgrade works at The Goods Line in Ultimo, NSW. The assessment included:

- Site walkover and soil investigation up to 7m.
- Evaluation of results against commercial/industrial land use criteria and NSW EPA waste classification standards.

Camden Council – Site Contamination Assessment

Undertook a Phase 1 Preliminary Site Contamination Assessment of a 16-hectare site for Scalabrini North Open Space & Riparian Area. Included desktop review, site walkover, targeted soil sampling and analysis, and development of a Conceptual Site Model. Prepared a comprehensive report assessing site suitability and recommending further investigation.

Hazardous Materials and Asbestos – Select Experience

Ku-ring-gai Council – Asbestos Building Materials Surveys
Cameron undertook surveys and resurveys for 35 Ku-ring-gai Council assets, including public facilities, childcare centres and commercial properties. This included reviewing previous Asbestos Building Materials Registers, locating previously identified items and updating their current condition and extent.

Presbyterian Aged Care – Hazardous Building Materials Surveys
Cameron was the project manager for hazardous building material surveys of 11 Presbyterian Aged Care assets. The project involved creating hazardous building material registers and an overarching management plan for all assets.

Cumberland City Council – Hazardous Building Materials Surveys
Cameron was project manager for hazardous building materials surveys for a mix of 28 residential and commercial Cumberland City Council assets. This involved coordinating with staff to arrange access, schedule surveys and track progress.

Busways Group Pty Ltd – Asbestos Building Materials Registers
Cameron was project manager for asbestos building materials surveys at 15 Busways sites throughout NSW, working to meet tight deadlines.

Occupational Hygiene – Select Experience

Penrith City Council – Mould Assessment Services
Cameron undertook a mould assessment within the Penrith Regional Art Gallery which included several heritage items and prepared a remedial action plan. Additionally, Cameron developed a Mould in Buildings procedure for Penrith City Council in the event of suspected mould within Council assets.

Occupational Exposure Assessments
Cameron has undertaken many occupational exposure assessments involving inhalable and respirable dusts (including silica), welding fumes, diesel particulates and VOCs, including:

- **RSGx Engineering Pty Ltd – Western Sydney Airport Project**
  Cameron undertook exposure monitoring for respirable silica dust for 10 staff involved in tunnelling works.
- **National Heavy Vehicle Regulator – Vehicle Inspection Stations**
  Cameron was the project manager and undertook exposure and control monitoring for diesel particulates at various vehicle inspection stations throughout New South Wales.
- **Narrabri Shire Council – Quarry Dust Monitoring**
  Cameron undertook monitoring for inhalable and respirable dust (including silica) on Council contractors.

The University of Technology, Sydney – Indoor Air Quality Monitoring
Cameron undertook an indoor air quality assessment in multiple UTS classrooms/workshops following complaints from staff and students. This involved reviewing safety data sheets and factors impacting air quality to design the program.
