Relevant Qualifications

- Bachelor of Science (Honours)
- CEnvP Site Contamination Specialist (SC40071)
- Licensed Asbestos Assessor – (LAA000133)
- NATA Accredited Signatory
- NATA Accredited Inspection Surveyor
- NATA Accredited Airborne Contaminant Exposure Sampler

Professional Overview

As Principal at Getex, Justin Thompson-Laing brings nearly two decades of senior leadership across land contamination, hazardous materials, occupational hygiene and environmental management. Leveraging his deep expertise in land contamination, he offers organisation-wide technical direction and quality oversight across all service areas, with a strong focus on maintaining NATA accreditation and high-integrity project delivery. As a Certified Environmental Practitioner – Site Contamination Specialist (CEnvP (SC)), he has achieved the national benchmark for excellence in contaminated site assessment and remediation. Justin has led more than 500 assessment, remediation and validation projects and is recognised for guiding teams and delivering complex, high-stakes outcomes for government, infrastructure and development clients.

Contaminated Land Management – Select Experience

NSW Rail Corporation – Remediation Environmental Services
Justin oversaw environmental services for the Newtown Railway Station Upgrade, including detailed contamination assessment, supervision, monitoring, and validation testing across Stages 1 and 2, as well as preparing the final validation reporting and management plans.

NSW National Parks & Wildlife Services – Remediation Project Management
As project manager for NPWS Bonne Vale Campground, Justin directed contamination investigations, remediation processes, risk assessments, ongoing monitoring and validation activities, and prepared management plans for continued site use.

Penrith City Council, Hickey's Lane Tip – Contamination for Soil, Groundwater, Air
Justin managed detailed contamination investigations for the former landfill, including soil, groundwater and landfill gas assessments. He led monitoring programs for surface and sub-surface landfill gas and was the lead writer for the remedial action plan and interim site contamination management plans.

Hazardous Materials and Asbestos – Select Experience

Intermodal Logistics Centre – Asbestos Monitoring and Advice
Justin provided field assistance including asbestos air monitoring services and asbestos-related occupational health and safety advice for the Intermodal Logistics Centre at Enfield.

Parramatta Linen – Friable Asbestos Removal Supervision Services
Justin provided supervision services during the removal of friable asbestos at Parramatta Linen. This included inspection of the quarantine enclosure, daily asbestos air monitoring and a final clearance inspection.

NSW Crown Solicitor's Office – Polychlorinated Biphenyls and Lead in Paint Assessment
Justin carried out sampling and reporting for the NSW Crown Solicitor's with respect to Polychlorinated Biphenyls and Lead in Paint.

ANSTO – Demolition Surveys
Justin led the team in conducting and successfully completing demolition surveys for hazardous materials (including hazardous metals) for multiple buildings within the ANSTO Lucas Heights grounds. The decommissioning of the buildings was able to be done safely following the hazardous materials management plans provided by Justin.

Occupational Hygiene – Select Experience

Marrickville Metro Shopping Centre Stage 1 Upgrade
Justin oversaw the project hygienist works for the Marrickville Metro Shopping Centre Stage 1 Upgrade. The works included training contractors on asbestos awareness and PPE; review contractor SWMS and provide updates; provide technical opinions in key stakeholder meetings; conduct daily site inspections of contamination mitigation measures; inspect equipment and areas to sign off as contaminant free.

Occupational Exposure Assessments
Justin has undertaken over 100 occupational exposure assessments involving inhalable and respirable dusts (including silica), welding fumes, diesel particulates and VOCs. Assessments involve reviewing client Safety Data Sheets to determine contaminants of concern and designing monitoring plans to comply with standards.

NPWS Minnamurra Rainforest Centre – Mould Contamination and Remediation Services
Justin oversaw the project hygienist works for the Minnamurra Rainforest Centre. The works included: mould contamination investigation, prepare the mould remediation plan, remediation supervision and validation of the building and all contents, as well as preparing the final validation reporting and management plans.

Corrective Services NSW – Hazardous Dust Assessment
Justin conducted inspections and testing of hazardous dust within the South Coast Correctional Centre. The assessment included determining the health risks to workers and appropriate management strategies.
