About Getex

Getex is an environmental and occupational hygiene consultancy supporting clients to manage asbestos, contaminated land and exposure risks.

Operating since 2005, we support councils, government agencies, infrastructure and defence operators, contractors and property managers. Our core work focuses on asbestos and hazardous building materials, contaminated land and soil risk, and exposure monitoring to support safe, compliant project delivery and asset management.

With offices in Sydney and the Central Coast, and projects delivered across regional New South Wales and interstate, our team includes Licensed Asbestos Assessors, NATA-accredited inspection surveyors and Certified Environmental Practitioner – Site Contamination Specialists. Our ISO-certified systems and NATA accreditation ensure consistent methodology, reliable reporting and defensible outcomes.

Getex is known for clear communication, responsiveness and a pragmatic approach on site, helping clients identify risks early, keep projects moving and meet their obligations with confidence.

Core Services

Getex delivers environmental and occupational hygiene services across hazardous materials, contaminated land and exposure risks. We deliver assessment, monitoring, management and technical oversight from investigation through to implementation, validation and ongoing compliance.

Asbestos & Hazardous Materials

- Asbestos surveys and registers
- Licensed Asbestos Assessor services
- Asbestos air monitoring and clearance inspections
- Hazardous materials surveys: lead, SMF, PCBs, ODS
- Hazardous materials registers and management plans

Image: Asbestos inspection, air monitoring and clearance services across operational and construction environments.

Core Services

Occupational Hygiene

- Occupational exposure monitoring
- Dust and particulate monitoring, including respirable crystalline silica
- Indoor and outdoor air-quality assessments
- Water-quality testing
- Mould investigations

Contaminated Land

- Soil, water and sediment sampling
- Site contamination assessments
- Waste classification
- Remedial Action Plans
- Site validation and management plans
- Landfill gas and acid sulfate soil assessments
- Pre-purchase and due diligence environmental assessments
- Emerging contaminants monitoring, including PFAS screening and assessment

Accreditations

Accreditations

Getex maintains independent third-party accreditation across quality management, occupational health and safety, and specialist inspection and assessment services.

We are certified to ISO 9001 (Quality Management Systems) and ISO 45001 (Occupational Health & Safety Management Systems), and accredited by the National Association of Testing Authorities (NATA) as an inspection body to ISO/IEC 17020 for asbestos and hazardous materials inspections and airborne contaminant monitoring.

These accreditations underpin the consistency of our methodology, the reliability of our monitoring data and the defensibility of our reporting in regulated environments.

- NATA Accreditation (ISO 17020) – Asbestos & Hazardous Materials Inspections and Surveys
- NATA Accreditation (ISO 17020) – Airborne Contaminant Monitoring
- ISO 9001 – Quality Management Systems
- ISO 45001 – Occupational Health & Safety Management Systems

NATA WORLD RECOGNISED ACCREDITATION

Certified System Quality ISO 9001 SAI GLOBAL

Certified System OHS ISO 45001 SAI GLOBAL

Why ISO/IEC 17020 Matters

- Independent inspection body accreditation
- Accredited survey and monitoring methodology
- Regulator-recognised reporting framework

Selected Work

Chullora Tank Annex: VOC-impacted soil remediation

On-site environmental oversight of remediation works, including VOC monitoring, environmental sampling and waste classification.

Arenco Pty Ltd

Hornsby Hospital: asbestos monitoring and staged works

Asbestos air monitoring, clearance and register management across ongoing works at an operational public hospital.

NSW Health

Western Sydney Airport Project: respirable silica exposure monitoring

Exposure monitoring for tunnelling works, including personal sampling and control verification during construction.

RSGx Engineering Pty Ltd

The Goods Line, Ultimo: soil contamination assessment for redevelopment

Site investigation and assessment to inform waste classification for commercial redevelopment works.

Graphite Projects

State government open space: remediation supervision and validation

Supervision of remediation for contaminated public land, including contractor direction and validation against remedial action plans.

NSW National Parks & Wildlife Service

Council asset portfolio: asbestos surveys and register rollout

Surveys and register development across council assets, including coordination of access, staging and updates within active facilities.

Cumberland City Council

Our People

Justin Thompson-Laing
Principal

Bachelor of Science (Honours)

CEnvP Site Contamination Specialist (SC40071)

Licensed Asbestos Assessor – (LAA000133)

NATA Accredited Signatory

NATA Accredited Inspection Surveyor

NATA Accredited Airborne Contaminant Exposure Sampler

As Principal Consultant at Getex, Justin Thompson-Laing brings nearly two decades of experience across land contamination, hazardous materials, occupational hygiene and environmental management. He provides organisation-wide technical direction and quality oversight, maintaining NATA accreditation and consistent project delivery standards.
A Certified Environmental Practitioner – Site Contamination Specialist (CEnvP (SC)), Justin has led more than 500 assessment, remediation and validation projects and is recognised for delivering complex outcomes for government, infrastructure and development clients.

Brodie Bishop
Senior Consultant

Bachelor of Science (Chemistry)

Master of Environment (Environmental Management)

Diploma of Laboratory Technology

Licensed Asbestos Assessor (LAA001486)

NATA Accredited Signatory

NATA Accredited Inspection Surveyor

NATA Accredited Airborne Contaminant Exposure Sampler

Senior Consultant with experience across contaminated land assessment and remediation, occupational hygiene and hazardous building materials. Brodie's background in geochemistry and laboratory technology supports rigorous analysis and technical decision-making.

He conducts specialised water-quality testing of Australian naval vessels prior to dock entry and is relied upon for technically demanding projects across multiple sectors.

Cameron Becker
Senior Consultant

Bachelor of Science (Honours)

Licensed Asbestos Assessor (LAA002168)

Provisional Member – Australian Institute of Occupational Hygienists

NATA Accredited Signatory

NATA Accredited Inspection Surveyor

NATA Accredited Airborne Contaminant Exposure Sampler

Senior Consultant specialising in hazardous materials, contaminated land and occupational hygiene. Cameron delivers investigations, monitoring programs and remediation oversight across a range of project environments.

He leads Getex's Central Coast office, providing responsive support to local government, builders, schools and infrastructure operators.

Our People

Brynley Pfull
Environmental Consultant

Bachelor of Environmental Science

NATA Accredited Inspection Surveyor

NATA Accredited Airborne Contaminant Exposure Sampler

Associate Member - Australian Institute of Occupational Hygienists

Environmental Consultant undertaking field investigations, sampling and reporting across contaminated land, hazardous materials and occupational hygiene. Brynley is valued for clear analysis, structured reporting and a practical approach to site work.

Hugh Scullin
Environmental Consultant

Bachelor of Science, Environmental and Resource Geology

NATA Accredited Inspection Surveyor

NATA Accredited Airborne Contaminant Exposure Sampler

Environmental Consultant supporting environmental assessment, field investigations and data analysis. Hugh brings a practical, adaptable approach to project delivery across site-based work and technical reporting.

Laetitia Shand
Specialist, Client and Commercial Services

Bachelor of Business, Marketing

Project Management Professional (PMP)

Laetitia leads client and commercial services at Getex, overseeing client engagement, project coordination and internal systems. She brings experience in strategic partnerships and program delivery at RMIT University.

What We Bring To Our Clients

Integrity

We operate with honesty and accountability in every interaction. We provide independent advice, communicate clearly about risks and requirements, and take the time to listen and understand what matters to our clients. We are transparent in our approach and committed to continuous improvement.

Flexibility

We adapt our services to fit how projects are delivered and how sites operate. We work within live environments, constrained access, staged works and evolving scopes, tailoring our approach to integrate smoothly with client systems, contractors and program requirements.

Quality

Our ISO-certified systems and NATA accreditation ensure rigorous methodology, technical accuracy and defensible outcomes. We seek feedback and refine our processes to maintain best practice.

Image: Getex adapts its approach to suit the specific requirements of each client and project, from naval vessels to public recreational land to operational property portfolios, integrating seamlessly with client systems and operational needs.

What our clients say

Our clients value our responsiveness, clarity and practical approach on site. We work with councils, government agencies and project teams across a range of environmental and occupational hygiene projects.

Service and communication from Justin and the team is excellent. Onsite conduct communication and presentation by Brynley has been excellent, and the pragmatic approach to work is notable and appreciated. Reports are good, succinct yet detailed where it matters.

Lachlan Desailly
Liverpool City Council

Brynley was easy to work with and a great communicator, adapting to our ever-increasing scope. The testing and reporting was organised and completed on time and to a high standard.

Will Bodor
National Parks and Wildlife Service

Thank you for another great project delivery. You're always responsive and meet our deadlines as required. Look forward to working with you again.

Kristina Mitkovski
Two Form Architecture + Interior Design

Thanks Getex, great work. And a special thanks to Justin, he was fast, reliable and dependable.

Alfonso Ruggero
NSW Health – Hornsby Hospital

It was an absolute pleasure to work with Cameron and the team! From my initial enquiry through to actual testing and the final reports, Cameron was very hands on and proactive. We did not have any issues, and all questions were answered promptly. We will definitely be using GETEX again for future occupational hygiene testing.
