Brynley Pfull

Environmental Consultant

Relevant Qualifications

- Bachelor of Environmental Science
- NATA Accredited Inspection Surveyor
- NATA Accredited Airborne Contaminant Exposure Sampler

Professional Overview

Environmental Consultant providing rigorous field investigations, sampling and technical reporting across contaminated land, hazardous materials and occupational hygiene. Known for his methodical approach, clear analysis and client focus, Brynley supports clients in meeting compliance obligations and managing environmental risks effectively. He brings to Getex a strong interdisciplinary foundation and a meticulous approach drawn from many years' experience in environmental science fieldwork and law.

Occupational Hygiene – Select Experience

Occupational Exposure Assessments

- **TS Global – Tomago Workshops**
  Exposure monitoring for respirable silica dust and inhalable dust, including welding fumes and isocyanates.
- **Penrith City Council – Kingswood Depot**
  Exposure and control monitoring projects for respirable dust (including silica).
- **Fire Fab Australia Pty Ltd – Ingleburn Workshop**
  Monitoring for inhalable dust, volatile organic compounds and atmospheric gases including ozone, carbon monoxide, nitrogen oxide and nitrogen dioxide.

Ku-ring-gai Council – Mould Assessment Services

Brynley undertook a mould assessment and air quality assessment within Turramurra Library.

Octavian Projects Pty Ltd – Air Quality Monitoring

Brynley undertook an outdoor air quality assessment to assess the suitability of a proposed childcare centre play area in Botany. This included measuring the presence of atmospheric gases including carbon monoxide, nitrogen dioxide, nitrogen oxide and sulfur dioxide, respirable dust (in the form of PM_{10} and $PM_{2.5}$) and VOCs.

Hazardous Materials and Asbestos – Select Experience

Kinderoos Australia Pty Ltd – Hazardous Building Materials Survey and Hazardous Materials Work Plan
Brynley undertook a hazardous building materials survey and hazardous materials work plan for a childcare centre in Rosebery. This involved the identification of asbestos, lead in paint, lead in dust, oxygen depleting substances, poly-chlorinated biphenyls containing substances and synthetic mineral fibres.

City of Canada Bay – Hazardous Building Materials Register
Brynley undertook a hazardous building materials survey for City of Canada Bay's Civic Building. This included documenting identification of hazardous materials within blueprints of the multi-level building in the final report.

St Nicholas Russian Orthodox Church – Asbestos Building Materials Register
Brynley undertook an asbestos building materials survey for the St Nicholas Russian Orthodox Church in Wallsend. This involved identifying, sampling and testing of potential asbestos-containing materials within the church, and preparing the asbestos building materials register.

Contaminated Land – Select Experience

Penrith City Council – Asbestos Remediation
Brynley was the on-site environmental consultant for the duration of remediation works at Union Inn. Work included:
- Oversight of contractor activities in alignment with the Site-Specific Management Plan and advisory support regarding site remediation procedures.
- Execution of hygiene services including asbestos air monitoring, lead sampling and monitoring and environmental sampling.
- Conducting classification of soil waste and asbestos-impacted soil in accordance with applicable regulatory frameworks.

NSW National Parks – Large Site Asbestos Sampling
Brynley has conducted over 15 asbestos trail inspections for various fire trails throughout the Royal National Park. These assessments have included:
- Identification of asbestos fragments and subsequent soil sampling.
- Additional delineation management and waste classifications.
- Asbestos clearance inspections.

Liverpool City Council – Detailed Site Contamination Assessment
Brynley undertook a Detailed Site Contamination Assessment at Ninth Avenue, Austral, including desktop review; site walkover; targeted soil, salinity, water and sediment sampling and analysis. A comprehensive report was prepared, assessing site suitability and providing recommendations for future site use.
